Redistricting committee,

I could not attend the hearing on Sunday 5-22-2011 but I want to voice my concerns about the current proposed map. In short, the map may provide security for the Democrats running for office in the future but it does very little to maintain security and stability for interest groups and majority minority districts. This map dilutes the percentage of minorities in most of its "majority minority" districts by over 7%, even if the districts have increased in minority percentage according to the current census data. I have seen a map which maintains majority minority districts at a respectable ratio of minorities, so I KNOW it can be done. Please listen to the people and vote NO, on the currently proposed map. Please review and support the map proposed by, United Congress of Community & Religious Organizations.

Thank You

Jeff Baker
