an idea for redistricting

I am in Rock Island and see how it is done in Iowa...last census two Republicans on this end of the state fell into the same district...this year the plan shows two Republicans falling into the same district in the west of the state.

These maps are arrived at using a nonpartisan method...they would not get a district like our own 17th which stretches across the state...that's partisan nonsense.

I know this will be rejected by politicians but I have done my bit.

Thank you,
Chuck Maki
