Letter of Support for Redistricting:

Dear House Redistricting Committee:

I Larisha Mcneal strongly support the 29<sup>th</sup> District Redistricting proposal. As a resident in the district I feel that the new map ensures that legislators would be more familiar with their community and it also links the legislators together to do a better and stronger job in their communities.

The redistricting also keeps local community businesses together and enables State Representative to provide the best representation within their district. The new redistricting map provides local residents with common interest to share representation so the State Representative can act as an advocate on our behalf.

Better than before, the new map includes clear and recognizable boundaries. This asset would allow constituents to know clearly who represents them and become more familiar with their State Representative.

Thank You

Larisha Mcneal
